## UVOX

## ECF 3

## Electro-Conductive Foam 3

## Product Overview

Uvox Series 3 Electro-Conductive Foam (ECF3) is an alternative to out
standard ECF through-conductive foam. The material consists of nickel-copper electroplated polyolefin foam with a conductive adhesive backing surmounted with a release liner.

Available thicknesses are from 0.3 mm to 1.0 mm . The material cuts cleanly, making it ideal for internal and perimeter sealing (IP60). ECF3 provides physical shock absorption with EM shielding or grounding.

## Application

- EM shielding and grounding in hand-held devices
- Conductive gaskets for small equipment, connectors and back-planes
- EMI window gaskets

## Construction

Properties

| Item | Material |
| :---: | :---: |
| Conductive Foam | Polyolefin foam: Copper/ <br> Nickel plated |
| Adhesive | Acrylic copolymer and Nickel <br> powder |
| Release Liner | CP paper or film $(70 \mu \mathrm{~m})$ |
| Colour | Grey |
